## Confined Space Entry and Exit Training

<b>Duration</b>	2 Days
<b>Target group</b>	This course is aimed at persons working in confined space environments where there is a medium risk that a specified hazard may be present. It will require the use of escape breathing apparatus. The course is designed to provide awareness of confined space entry hazards and procedures for operating company and contractor personnel involved in controlling entry to confined spaces and rescue procedures, combined with practical training in entry and escape.
<b>Prerequisites</b>	No prior training is required by delegates attending this training course, However, it is the responsibility of the employer or delegates to assess their ability and fitness to safely attend this training programme.
<b>Objective</b>	The course is designed for the delegates to acquire basic knowledge and skills through a combination of lecture presentations, group discussions, demonstrations, individual team exercises utilising a confined space simulator and based in accordance with the HSE confined space regulations. The course content can be tailored to suit the customer's particular requirements.
