Marine Trash and Debris Awareness - OSHA Standards

Duration	20 Minutes
Target group	Oil & Gas Industry
Prerequisites	No prerequisites are required to sit this course.
Objective	LO1: Define marine trash and debris and identify common sources LO2: Identify the destination of marine trash and debris LO3: Explain the risk marine trash and debris pose to the environment LO4: Describe common causes of marine trash and debris LO5: Explain laws and regulations and preventative measures that stop trash and debris from entering the water
Contents	The course is available in the following languages: US English; Turkish. The aim of this course is to inform about the different types of marine trash and debris and the impact that it has on the environment. The course will also allow you to identify common sources and destinations of marine trash and debris and explain the laws, regulations and preventative measures that prevent trash and debris from polluting the waterways. Employers should provide additional training when a new hazard/procedure/condition or piece of equipment is introduced into the workplace or “unscheduled” refresher training is recommended as directed to address inadequacies in knowledge and to address unsafe acts/deviations from procedures.
Exam	The assessment is taken during the course and is within the expected duration.
