

OBSMY060

Basic Offshore Safety Induction and Emergency Training (BOSIET) with Compressed Air Emergency Breathing System (CA-EBS) + BOSIET+BT (OPITO Approved)

Duration	3 Days
Target group	This training programme is designed to meet the initial offshore safety and emergency response training requirements for personnel new (or returning) to different part of the world's offshore oil and gas industry who will be supplied with either a compressed air emergency breathing system (CA-EBS) or a re-breather (EBS) during offshore helicopter travel and are required to travel by boat.
Prerequisites	All participants must be in possession of a valid medical certificate
Objective	The aim of the BOSIET (with CA-EBS) and BOSIET (with Re-breather) is to introduce delegates to the specific safety issues and regimes relevant to offshore installations and to equip them with the basic emergency response knowledge and skills for travelling to and from offshore installations either by helicopter or transferring safely by boat
