

## OTCMY003

## **IWCF Well Intervention Certification Course**

Target group  This course is designed for IWCF well control certification for derrick massistant driller, driller, toolpusher and company representative.  Prerequisites  All delegates must be in possession of a valid medical and IWCF drilling well control certificate.  Objective  During the course delegates will gain knowledge and understanding of well control for surface and subsea installations at driller or supervisor level that meets international well control forum (IWCF) standard.  Contents  Primary Well Control Fluid Hydrostatics U - Tube Principles Fracture Pressure / MAASP Well Kill Procedures Drillers and Wait & Weight Methods Gas Migration Dynamic Annulus Gas Profiling Boyle's Law Well Control Equipment Oil Base & Water Base Muds Rig Simulator Practical Training and IWCF Examination		
assistant driller, driller, toolpusher and company representative.  Prerequisites  All delegates must be in possession of a valid medical and IWCF drilling well control certificate.  During the course delegates will gain knowledge and understanding of well control for surface and subsea installations at driller or supervisor level that meets international well control forum (IWCF) standard.  Contents  Primary Well Control Fluid Hydrostatics U - Tube Principles Fracture Pressure / MAASP Well Kill Procedures Drillers and Wait & Weight Methods Gas Migration Dynamic Annulus Gas Profiling Boyle's Law Well Control Equipment Oil Base & Water Base Muds Rig Simulator Practical Training and IWCF Examination	Duration	3 Days
Objective  During the course delegates will gain knowledge and understanding of well control for surface and subsea installations at driller or supervisor level that meets international well control forum (IWCF) standard.  Contents  Primary Well Control Fluid Hydrostatics U - Tube Principles Fracture Pressure / MAASP Well Kill Procedures Drillers and Wait & Weight Methods Gas Migration Dynamic Annulus Gas Profiling Boyle's Law Well Control Equipment Oil Base & Water Base Muds Rig Simulator Practical Training and IWCF Examination	Target group	This course is designed for IWCF well control certification for derrick man assistant driller, driller, toolpusher and company representative.
well control for surface and subsea installations at driller or supervisor level that meets international well control forum (IWCF) standard.  Contents  Primary Well Control Fluid Hydrostatics U - Tube Principles Fracture Pressure / MAASP Well Kill Procedures Drillers and Wait & Weight Methods Gas Migration Dynamic Annulus Gas Profiling Boyle's Law Well Control Equipment Oil Base & Water Base Muds Rig Simulator Practical Training and IWCF Examination	Prerequisites	All delegates must be in possession of a valid medical and IWCF drilling well control certificate.
Fluid Hydrostatics U - Tube Principles Fracture Pressure / MAASP Well Kill Procedures Drillers and Wait & Weight Methods Gas Migration Dynamic Annulus Gas Profiling Boyle's Law Well Control Equipment Oil Base & Water Base Muds Rig Simulator Practical Training and IWCF Examination	Objective	During the course delegates will gain knowledge and understanding of well control for surface and subsea installations at driller or supervisor level that meets international well control forum (IWCF) standard.
U - Tube Principles Fracture Pressure / MAASP Well Kill Procedures Drillers and Wait & Weight Methods Gas Migration Dynamic Annulus Gas Profiling Boyle's Law Well Control Equipment Oil Base & Water Base Muds Rig Simulator Practical Training and IWCF Examination	Contents	Primary Well Control
Fracture Pressure / MAASP  Well Kill Procedures  Drillers and Wait & Weight Methods  Gas Migration  Dynamic Annulus Gas Profiling  Boyle's Law  Well Control Equipment  Oil Base & Water Base Muds  Rig Simulator Practical Training and IWCF Examination		Fluid Hydrostatics
Well Kill Procedures Drillers and Wait & Weight Methods Gas Migration Dynamic Annulus Gas Profiling Boyle's Law Well Control Equipment Oil Base & Water Base Muds Rig Simulator Practical Training and IWCF Examination		U - Tube Principles
Drillers and Wait & Weight Methods Gas Migration Dynamic Annulus Gas Profiling Boyle's Law Well Control Equipment Oil Base & Water Base Muds Rig Simulator Practical Training and IWCF Examination		Fracture Pressure / MAASP
Gas Migration  Dynamic Annulus Gas Profiling  Boyle's Law  Well Control Equipment  Oil Base & Water Base Muds  Rig Simulator Practical Training and IWCF Examination		Well Kill Procedures
Dynamic Annulus Gas Profiling  Boyle's Law  Well Control Equipment  Oil Base & Water Base Muds  Rig Simulator Practical Training and IWCF Examination		Drillers and Wait & Weight Methods
Boyle's Law Well Control Equipment Oil Base & Water Base Muds Rig Simulator Practical Training and IWCF Examination		Gas Migration
Well Control Equipment Oil Base & Water Base Muds Rig Simulator Practical Training and IWCF Examination		Dynamic Annulus Gas Profiling
Oil Base & Water Base Muds  Rig Simulator Practical Training and IWCF Examination		Boyle's Law
Rig Simulator Practical Training and IWCF Examination		Well Control Equipment
		Oil Base & Water Base Muds
Exam N/A		Rig Simulator Practical Training and IWCF Examination
	Exam	N/A
