## Human Factors for Wind Energy

---

**Duration** 20 minutes

---

**Target group** Personnel who will be working in the wind industry or related fields, and will carry out their duties in a wind turbine environment, usually in physical contact with a wind turbine or offshore wind structure.  
Personnel that perform job functions that have been risk assessed by their employer or workplace, where training according to one or more modules of the BST standard may mitigate the identified risks.

---

**Prerequisites** No prerequisites are required to sit this course.

---

**Objective**

- LO1: Define what is meant by the term 'human factors' and how they can affect human performance in the workplace
- LO2: Identify the areas of risk associated with human factors
- LO3: Describe the potential causes of stress and fatigue and recognise the symptoms in yourself and others
- LO4: Explain the importance of competence in human factors
- LO5: Summarise the role human factors play in good design
- LO6: Summarise how organisational change can impact human factors
- LO7: Explain why good communication is essential in managing human factors
- LO8: Explain the key steps to mitigating risk associated with human factors

---

**Contents** To provide an overview of human factors in the wind industry and the impact these factors can have on the day-to-day situations that occur.

---

**Exam** The assessment is taken during the course and is within the expected duration.
