

NSC400

Bideloid (Shoulder) Measurement

Duration 15 minutes

Target group Employees travelling offshore by helicopter

Prerequisites None

The delegate should wear a sleeveless top or bare arms for being measured.

The measuring will be done during the course day.

Objective EASA (European Aviation Safety Agency) has implemented regulation AMC1 SPA.HOFO.165 (h) which means that from 1 November 2018, all passengers travelling offshore by helicopter will be required to sit in a seat where the nearest underwater emergency exit is compatible with their body size.

Contents Helicopter passengers will be measured by the width of their shoulders and those whose shoulder width is greater than 55.9 cm will be classified as XBR.

Passengers measuring 54.8 cm and above will need to be re-measured after 4 years.

Exam None
