

OBSRDL015

## Authorised Gas Tester (OPITO Approved)

---

<b>Duration</b>	240 Minutes
-----------------	-------------

---

<b>Target group</b>	Oil & Gas Industry
---------------------	--------------------

---

<b>Prerequisites</b>	<p>No training prerequisites are required to sit this course. OPITO requires that the delegate sitting this course provide photographic ID and their date of birth before starting this training.</p> <p>Your identification documents are required to validate your identity. The following documents are accepted:</p> <ul style="list-style-type: none"><li>Passport</li><li>Driving Licence</li><li>Form of government issued ID</li></ul> <p>What should I do to confirm my identity?</p> <p>Take a "selfie" by holding your ID card Card holder name and ID card should match and be clearly visible Your ID must be next to your face Please note: Your image provided to us will be deleted from our records after verification is complete.</p>
----------------------	--

---

<b>Objective</b>	<p>Unit 1 - Authorised Gas Tester</p> <ul style="list-style-type: none"><li>LO1: Confined space criteria</li><li>LO2: The type of operations being tested for flammable and toxic gases</li><li>LO3: The hazards of operations within an oxygen-enriched, oxygen-deficient, toxic or flammable environment</li><li>LO4: Carrying out a suitable and sufficient risk assessments</li><li>LO5: Understand the safe systems of work, how to work within the safe system of work and the associated responsibilities</li><li>LO6: The implications of statutory and organisational requirements</li><li>LO7: Interpreting operational requirements</li><li>LO8: How to select, use and care for PPE and RPE</li><li>LO9: How to access and interpret the relevant operational instructions</li><li>LO10: The operating principles of atmosphere monitoring and measuring equipment and frequently observed failure modes</li><li>LO11: The strengths and weaknesses of the various types of atmospheric flammable and toxic gas detection equipment</li><li>LO12: How to correctly select between aspirating and non-aspirating detectors to obtain a representative sample of the atmosphere being tested</li><li>LO13: Equipment required for testing for hydrocarbons in inert atmospheres</li><li>LO14: Gas detector pre-start checks</li><li>LO15: Determining the extent of the test boundaries</li><li>LO16: Calibrating the instruments used in atmospheric testing</li><li>LO17: Sources of assistance in the event of damaged or defective equipment</li><li>LO18: How to interpret the results, to include both normal and abnormal</li><li>LO19: How to document the results and advise relevant personnel</li></ul> <p>Unit 2 - Testing for Flammable Gas in Preparation for Hot Work</p> <ul style="list-style-type: none"><li>LO1: Hot work (any operation involving naked flames or producing heat and/or sparks or any operation that has spark potential)</li><li>LO2: The type of operations being tested for flammable and toxic gases</li><li>LO3: The principles of hot work gas testing</li><li>LO4: The hazards and properties of flammable gases</li></ul>
------------------	---

---

LO5: Acceptable levels of flammable gases and the correct amount of oxygen  
LO6: Carrying out a suitable and sufficient risk assessment before testing activities  
LO7: Using safe systems of work and understanding the associated responsibilities  
LO8: The different types of detectors used for the flammable product  
LO9: How to set up the relevant detector for each gas testing application and confirm its correct functioning  
LO10: The range and frequency of tests and monitoring and retesting requirements  
LO11: Where to site portable or transportable equipment that will be used to continuously monitor the atmosphere

#### Unit 3 – Confined Space Testing

LO1: The hazards and properties of flammable and toxic gases  
LO2: The behaviour of different gases  
LO3: The range and frequency of tests and monitoring and retesting after the initial entry  
LO4: Acceptable levels of flammable and toxic gases and the correct amount of oxygen  
LO5: The implications of WEL for toxic gases and LEL for flammable gases  
LO6: How to set up the relevant detectors for each gas testing application and confirm functioning correctly  
LO7: Performing gas tests in sequence  
LO8: How to obtain representative atmosphere sample  
LO9: Taking various samples to locate varying concentrations of gases and vapours  
LO10: Importance of sampling confined spaces at a distance  
LO11: Testing flammable gases in inert atmospheres  
LO12: Where to site portable or transportable equipment that will be used to continuously monitor the atmosphere

#### Unit 4 - Gas Monitoring

LO1: Responsibilities of the Fire Watch  
LO2: Responsibilities of the Standby Person  
LO3: Responsibilities of the Gas Monitor role  
LO4: Impact of environmental changes on working conditions  
LO5: The importance of checking that the controls on the equipment are as specified  
LO6: Sources of assistance and specialist support

---

## Contents

The course is available in the following languages: English; Brazilian Portuguese; Spanish; Danish; Norwegian

This course is accredited to the OPITO Authorised Gas Tester standard and has been designed to equip delegates with the knowledge to conduct gas testing within confined spaces and awareness of associated confined hazards. The authorised gas tester role is critical in testing for and ensuring safe working atmospheres, in particular: permit-controlled confined spaces, and prior to and during hot work.

Our course has been developed in bitesize learning chunks for each topic. At the end of each unit, there will be an assessment. Delegates will need to pass each module at 80 percent or above. When you pass the course, you will be issued with a certificate which is valid for 3 years.

The aim of this course is to teach you the requirements associated with gas detection. On successful completion, you will have the basic knowledge necessary to allow you to operate as an Authorised Gas Tester. You will be given two attempts at each module, and you must score 80 percent to pass.

#### OPITO Standards Information

It is the responsibility of delegates taking an OPITO-Approved e-Learning Course to use the links below to access the appropriate Course Standard (on the OPITO website) so that they are aware of the requirements of the OPITO Standards.

Please click here: <https://www.opito.com/standards/authorised-gas-tester>

---

Learning outcomes per unit:  
Authorised gas tester  
Outcome: Relevant Legislative Controls  
Outcome: The principles and use of Atmosphere Measuring and Monitoring Equipment  
Testing for flammable gas in preparation for hot work  
Outcome: Gas Testing for Hot Work  
Confined space testing  
Outcome: Gas Testing in Confined Spaces  
Gas monitoring  
Outcome: Providing Safety Watch Duties

---

**Exam**

This course is CPD approved. The assessment is taken during the course and is within the expected duration.
