

IBSRDL630

Respiratory Protection Equipment (RPE) - OSHA Standards

Duration 25 Minutes

Target group Oil & Gas Industry
29 CFR 1926.451

Prerequisites No prerequisites are required to sit this course.

Objective LO1: Explain the legislation, roles and responsibilities relating to RPE
LO2: Explain how to select appropriate RPE for a given task
LO3: Identify the various types of filters and their associated use
LO4: Identify the various types of RPE used offshore
LO5: Describe the factors to be aware for ensuring properly fitting RPE
LO6: Explain how to correctly maintain, store and dispose of RPE

Contents This course is available in the following languages: US English; Spanish; Turkish
This course will help you to understand the importance of proper Respiratory Protective Equipment (RPE) use in hazardous workplace environments. You will learn about legislation, maintenance, the fit of various types of RPE, and be able to select adequate and suitable RPE for a given task or situation. Employers should provide additional training when a new hazard/procedure/condition or piece of equipment is introduced into the workplace or “unscheduled” refresher training is recommended as directed to address inadequacies in knowledge and to address unsafe acts/deviations from procedures.

Exam The assessment is taken during the course and is within the expected duration.
