

<b>Course code</b>	RBSRDL009
<b>Course name</b>	Working at Height for Wind Energy
<b>Duration</b>	60 Minutes
<b>Target group</b>	Renewable Energy Industry
<b>Prerequisites</b>	No prerequisites are required to sit this course.
<b>Objective</b>	<p>LO1: Explain global and national legislation  LO2: Explain manufacturer and legal inspection periods  LO3: Explain the principles and importance of self-inspection of a full body harness for defects and significant wear  LO4: Correctly identify the standards markings and inspection dates on a full body harness  LO5: Explain the importance of correctly adjusting a full body harness  LO6: Explain documentation, instrument number and authorisation date  LO7: Explain how to store and maintain a harness  LO8: Explain why fall prevention is better than fall arrest  LO9: Explain the importance of personal safety when using work positioning lanyards  LO10: Explain the types and use vertical fall arrest systems  LO11: Explain periodic inspection requirements for fall arrest systems  LO12: Explain the legal requirements and various types of fall arrest lanyards  LO13: Explain the fall factor  LO14: Explain approved anchor points for fall arrest attachment  LO15: Explain the types and use of backup systems  LO16: Explain the risks posed by dropped objects  LO17: Explain which items constitute a dropped object hazard  LO18: Describe typical injuries that can occur as a result of a dropped object  LO19: Explain how to reduce the risk of dropped objects  LO20: Describe the contents of an evacuation kit  LO21: Explain the individual parts of the rescue equipment</p>
<b>Contents</b>	The aim of this course is to provide you with an awareness of legislation, risks, equipment and guidance to enable you to safely carry out work at heights in a wind turbine environment.
<b>Exam</b>	The assessment is taken during the course and is within the expected duration.
